

Best Autoguider

Best Autoguider? - posted in CCD/CMOS Astro Camera Imaging & Processing: Hi All, In starting down the road to a remote set up I have been wondering what the best guider option is. Main scope will be a 130mm APO f4.5 on a PMX+. Guide scope will be something like a 60mm good quality refrac. Guiding will be done in Maxim 6 via ACP if that has any ...

Best Autoguider and Guide Scope for 2019 - Astronomy Online

Standalone Autoguiders: Which one is best and why? - posted in Cameras: Guys, Im hunting around for a decent standalone AG. Anyone know which is best and why? My mounts are: NEQ6, Paramount GT1100, Titan 50 and a homemade 500kg payload GEM with ST-4 input. Thanks, James

Standalone Autoguiders: Which one is best and why ...

For this reason, its always best to invest in a quality telescope mount that has been proven to be a reliable choice for deep sky astrophotography. Thankfully, basic autoguiding is enough to correct most of the issues associated with modern equatorial mounts.

Autoguiding a Telescope for Deep Sky Astrophotography ...

And while nearly any astronomy camera can be used as an autoguider, cameras with monochrome sensors, small pixel size, and high sensitivity work best. About the Author Brian Ventrudo is a writer, scientist, and astronomy educator.

Selecting a Guide Scope and Autoguiding Camera for ...

Hi allOk, having done some unguided imaging and well and trully caught the bug as it were... I am now starting actively planning to take the next step and get guiding.For the time being... I am sticking to my original plan which was to get the best stand-alone imaging set up I can for taking to S...

Stand alone autoguiders - advice please - Discussions ...

I've been considering an autoguider setup. I was considering the Orion awesome autoguider package (with the 80mm Orion short tube). But it's a bit more expensive than this one (especially to get all the requirements to attach it to my scope).

60mm Starwave Guide Scope Package for Autoguiding

Beginner Equipment for Astrophotography A DSLR, a small refractor, and a decent equatorial mount are all you need to get started! These are my latest recommendations for a telescope, mount, camera, and basic accessories for beginner astrophotography.

Beginner Equipment for Astrophotography

It is a stand-alone autoguider, one that doesn't need a laptop or software to operate; all that's needed is a second telescope. We're looking at one of the first off-the-shelf retail SynGuiders here.
