Synonyms, crossword answers and other related words for SMALL PARTICLE [molecule] We hope that the following list of synonyms for the word molecule will help you to finish your crossword today.

SMALL PARTICLE - crossword answers, clues, definition ...

The Krebs cycle generates only two ATP molecules per glucose molecule. This is because, when glucose is broken down in glycolysis to produce two molecules of pyruvate, and each pyruvate

molecule is carboxylated into an acetyl, each acetyl group goes through Krebs cycle only once, and produces one ATP molecule as a result.

What is the Krebs Cycle? (with pictures) - wisegeek.com

Science Questions and Answers - eNotes.com

If an amino acid's carbon skeleton can be converted to pyruvate or a citric acid cycle intermediate, it can follow gluconeogenic pathways to glucose. Such amino acids are glucogenic. If a carbon skeleton is converted to acetyl CoA, it cannot be made into glucose. It can, however, be made into a ketone body, so these amino acids are ketogenic.
