The MPhil and PhD programmes in Chemical Engineering attract students from diverse disciplinary backgrounds such as statistics, maths, electrical engineering, chemistry and physics. You may work on multidisciplinary research projects in collaboration with colleagues across the University or from external organisations.

### **Chemical Engineering MPhil, PhD - Postgraduate - ncl.ac.uk**

A chemical substance is a form of matter having constant chemical composition and characteristic properties. A chemical substance cannot be separated into its constituent elements by physical separation methods, i.e., without breaking chemical bonds. Chemical substances can be simple substances, chemical compounds, or alloys.

Industrial engineers (IEs) apply science, mathematics, and engineering methods to complex system integration and operations. Because these systems are so large and complex, IEs need to have knowledge and skills in a wide variety of disciplines, the ability to work well with people, and a broad, systems perspective.
