A flight management system (FMS) is a fundamental component of a modern airliner's avionics. An FMS is a specialized computer system that automates a wide variety of in-flight tasks, reducing the workload on the flight crew to the point that modern civilian aircraft no longer carry flight engineers or navigators.

Thanks for this story- pilots' perspectives on the experience of flying different aircraft are always interesting to read. A question: the 757 obviously outperforms both the 737 and A320 (though, as I understand it, it was also designed for longer flights to begin with); is the 767's performance superior to other aircraft of comparable size ...

Test Stand XL Upgrades. Avtron's K738 and K400B Generator Test Stands have proven to be highly reliable, even after many years of service. While the motors and gearboxes on these systems can continue to serve the applications for which they were designed, more modern electronics can further extend system life and improve test efficiency.
