

How To Use Manual Focus

Autofocus is great, but like anything with “auto” in the name, it’s not completely infallible. An object moving in front of your subject, a low contrast scene, or shooting through objects like a chain link fence can all throw off the autofocus system, resulting in a soft shot or even no shot at all.

How To Use Manual Focus (And Still Get Sharp Images)

On the side of your lens, look for a switch labeled “AF - MF,” which is short for Autofocus and Manual Focus, respectively. When you're ready to shoot in MF mode, switch your lens to that setting. At this point, half-pressing the shutter -- what you'd normally do to find focus in AF mode -- is a useless action.
