

Internal Combustion Engine Definition

An internal combustion engine (ICE) is a heat engine where the combustion of a fuel occurs with an oxidizer (usually air) in a combustion chamber that is an integral part of the working fluid flow circuit.

Internal combustion engine - Wikipedia

Internal combustion engine definition is - a heat engine in which the combustion that generates the heat takes place inside the engine proper instead of in a furnace.

Internal Combustion Engine | Definition of Internal ...

The "voyageurs" form a kind of confraternity in the Canadas, like the arrieros, or carriers of Spain, and, like them, are employed in long internal expeditions of travel and traffic: with this difference, that the arrieros travel by land, the voyageurs by water; the former with mules and horses, the latter with batteaux and canoes.
