

Introductory Econometrics Wooldridge 5th Edition

Econometrics is the application of statistical methods to economic data in order to give empirical content to economic relationships. More precisely, it is "the quantitative analysis of actual economic phenomena based on the concurrent development of theory and observation, related by appropriate methods of inference". An introductory economics ...

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.

Glossary of research economics - econterms

ANS: B. The affective domain concerns feelings, needs, beliefs, values, and opinions. The cognitive domain is the level at which basic knowledge is learned and stored; it is the thinking portion of the learning process.
