Mattes are used in photography and special effects filmmaking to combine two or more image elements into a single, final image. Usually, mattes are used to combine a foreground image (e.g. actors on a set or a spaceship) with a background image (e.g. a scenic vista or a starfield with planets).

Matte (filmmaking) - Wikipedia

In geometry, the tangent line (or simply tangent) to a plane curve at a given point is the straight line that "just touches" the curve at that point.

Tangent - Wikipedia

Flickr. It is critically important to approach the editing, or red-lining (think red ink like that used by your teachers growing up), of contracts in an intelligent manner.

How to Red-Line a Contract | Inc.com

Structure of a program The best way to learn a programming language is by writing programs. Typically, the first program beginners write is a program called "Hello World", which simply prints "Hello World" to your computer screen.

Structure of a program - C++ Tutorials

Which is which (or that)? It's essential (and non-essential) to know "That" restricts the reader's thought, directing attention to a specific bit of information to complete a message's meaning.
