Since the Renaissance, every century has seen the solution of more mathematical problems than the century before, yet many mathematical problems, both major and minor, still remain unsolved. These unsolved problems occur in multiple domains, including physics, computer science, algebra, analysis, combinatorics, algebraic, discrete and Euclidean ...

Charge transport and energy transfer in advanced materials In recent years, researches focusing on advanced materials and on molecular level of understanding in biological systems have attracted a lot of attention. One class of important reactions in these areas is the electron transfer (ET) process.
