In the early 1990s, after a decade of education research to develop and validate Modeling Instruction(TM), physicist David Hestenes was awarded grants from the National Science Foundation for another decade to spread the Modeling Instruction(TM) program nationwide.

Modeling Instruction TM in High School Sciences. The Modeling Method of High School Physics Instruction began development at Arizona State University in 1990 under the leadership of David Hestenes, now Emeritus Professor of Physics, and Malcolm Wells, award-winning high school physics teacher in Tempe.

Welcome to Chemistry Matters - a new digital series for high school chemistry from Georgia Public Broadcasting! The series is comprised of 12 units of study divided into segments. Under each segment you will find support materials designed to enhance student understanding of the content.

Deterministic modeling process is presented in the context of linear programs (LP). LP models are easy to solve computationally and have a wide range of applications in diverse fields. This site provides solution algorithms and the needed sensitivity analysis since the solution to a practical problem is not complete with the mere determination ...

1. Introduction. The discovery of Ziegler-Natta (ZN) catalysts in the 1950s for the polymerization of olefins is one of the fundamental events of the last century in chemistry that has also had huge impact on the chemical industry [ , , , ]. Heterogeneous ZN catalysts, are among the most important industrial catalysts used in polymerization ...

Market Analysis Report. Summary: Proteomics attribute to the study of proteomes, but is also used to characterize the techniques used to determine the complete set of proteins of an organism or system, such as protein purification and MS. Proteomics is a developing field that has been deeply enabled by the human genome project.
