How to disassemble Compaq Presario CQ50 CQ60 CQ70 - Inside ...

The idea is that it reheats the solder. The theory is that fractures form inside the solder points on boards, which causes instability. By reflowing the solder, you get rid of the fractures, and sometimes you can bring apparently dead parts back to life.

What is a reflow? (Laptop Repair) | Tom's Guide Forum

The connector is a very delicate mechanism. It's very easy to get it damaged if you apply too much force while trying to unlock it. The cable retainer (locking clip) is made of thin plastic and if it's damaged, you are in trouble.
