The Apollo Mission to the moon depended on software to program the computers in the landing modules. The computers were programmed with a language called BASIC. The software also had an interpreter which was made up of a series of routines and an executive (like a modern-day operating system), which specified which programs to run and when ...

In business and accounting, net income (also total comprehensive income, net earnings, net profit, bottom line, sales profit, or credit sales) is an entity's income minus cost of goods sold, expenses and taxes for an accounting period. It is computed as the residual of all revenues and gains over all expenses and losses for the period, and has ...

Net income - Wikipedia

Shinto Overshadowed by Buddhism. The introduction of Buddhism to Japan immediately sparked the interest of Japan's ruling elite, and within a century Buddhism became the state creed, quickly supplanting Shintō as the favorite of the Japanese imperial court (Mahayana Buddhism was the form favored by the court).
