Road Accident Reconstruction 2 Background This Best Practice Manual (BPM) belongs to a series of 10 BPMs issued by the European Network of Forensic Science Institutes (ENFSI) in November 2015.

Version 01 - November 2015 - ENFSI

Currently used by private practice Collision Reconstructionists and Traffic Investigators across North America. The Bosch Crash Data Retrieval System is a proven tool that allows Collision Reconstructionists investigating vehicle crashes the opportunity to image crucial crash data parameters from a vehicle that has been in a crash.

Different BIM creation processes for new 3 and existing 4 buildings are depicted in Fig. 2. For new buildings, BIM is created in a process over several LC stages, starting from inception, brief, design to production (case I) and part of the project delivery.

Building Information Modeling (BIM) for existing buildings ...

Triangulation based 3D laser scanners are also active scanners that use laser light to probe the environment. With respect to time-of-flight 3D laser scanner the triangulation laser shines a laser on the subject and exploits a camera to look for the location of the laser dot.

3D scanning - Wikipedia

Un escáner 3D de tiempo de vuelo determina la distancia a la escena cronometrando el tiempo del viaje de ida y vuelta de un pulso de luz. Un diodo láser emite un pulso de luz y se cronometra el tiempo que pasa hasta que la luz reflejada es vista por un detector.
