

Qualitative Analysis And Chemical Bonding

Learn and research science, chemistry, biology, physics, math, astronomy, electronics, and much more. 101science.com is your scientific resource and internet science PORTAL to more than 20,000 science sites.

Chemistry - 101science.com

Derivatization is a technique used in chemistry which transforms a chemical compound into a product (the reaction's derivate) of similar chemical structure, called a derivative.

Derivatization - Wikipedia

AOMix is a user-friendly software for the molecular orbital (MO) analysis. It calculates the MO compositions in terms of the constituent chemical fragments (you can specify them as atoms, groups of atoms, atomic orbitals, fragment molecular orbitals, groups of atomic orbitals, etc.) in the molecule or atom.

Headspace sampling is excellent for the qualitative or quantitative analysis of volatile species in samples that can be efficiently partitioned into the headspace gas volume from either a liquid or solid matrix.

I hope all these self-assessment quizzes and work sheets will prove useful, whatever course you are doing. Scroll down to see what's on offer and F/H means differentiation for UK GCSE/IGCSE foundation/higher level tier quizzes (it basically means easier on limited knowledge and harder on wider ranging questions).

GCSE/IGCSE chemistry multiple choice quizzes revision ...

In chemistry, a molecular orbital (MO) is a mathematical function describing the wave-like behavior of an electron in a molecule. This function can be used to calculate chemical and physical properties such as the probability of finding an electron in any specific region.

Molecular orbital - Wikipedia
