

Solution Manual Of Control System

A fire-control system is a number of components working together, usually a gun data computer, a director, and radar, which is designed to assist a weapon system in targetting, tracking and hitting its target.

Fire-control system - Wikipedia

A control system manages, commands, directs, or regulates the behavior of other devices or systems using control loops. It can range from a single home heating controller using a thermostat controlling a domestic boiler to large Industrial control systems which are used for controlling processes or machines.

Control system - Wikipedia
