

Solutions Nonlinear Equations

Nonlinear algebraic equations, which are also called polynomial equations, are defined by equating polynomials to zero. For example, $+ - =$. For a single polynomial equation, root-finding algorithms can be used to find solutions to the equation (i.e., sets of values for the variables that satisfy the equation).

Nonlinear Analysis | ScienceDirect.com

In this tutorial we will be specifically looking at systems of nonlinear equations that have two equations and two unknowns. We will look at solving them two different ways: by the substitution method and by the elimination by addition method.

The Journal of Differential Equations is concerned with the theory and the application of differential equations. The articles published are...

Journal of Differential Equations - Elsevier

In this chapter we will look at several of the standard solution methods for first order differential equations including linear, separable, exact and Bernoulli differential equations. We also take a look at intervals of validity, equilibrium solutions and Euler's Method. In addition we model some physical situations with first order ...

Highly Accurate Solutions of the Blasius and Falkner-Skan ...

In this chapter we will start looking at second order differential equations. We will concentrate mostly on constant coefficient second order differential equations. We will derive the solutions for homogeneous differential equations and we will use the methods of undetermined coefficients and variation of parameters to solve non homogeneous ...

Differential Equations - Second Order DE's

The Rocky Mountain Journal of Mathematics is published by the Rocky Mountain Mathematics Consortium. The journal publishes both research and expository articles in mathematics, and particularly invites well-written survey articles.

Linear equations like $y = 2x + 7$ are called "linear" because they make a straight line when we graph them. These tutorials introduce you to linear relationships, their graphs, and functions.

Nonlinear Studies

A system of equations is a collection of two or more equations with the same set of variables. In this blog post,...

System of Equations Calculator - Symbolab

It is well known that the constructions of space-filling curves depend on certain substitution rules. For a given self-similar set, finding such rules is somehow mysterious, and it is the main concern of the present paper.
