

Spatial Apperception Study Guide

The Selection Instrument for Flight Training or SIFT is the Army's test to see if a potential future pilot is academically qualified. The test lasts about three hours with a break in the middle and ranges from sections that will test your math and physics (an important skill for an aviator) to seeing how fast you can think and react.

In natural science no less than in mathematics, Kant held, synthetic a priori judgments provide the necessary foundations for human knowledge. The most general laws of nature, like the truths of mathematics, cannot be justified by experience, yet must apply to it universally.

Kant: Synthetic A Priori Judgments - Philosophy Pages

The basis for Leibniz's philosophy is pure logical analysis. Every proposition, he believed, can be

expressed in subject-predicate form. What is more, every true proposition is a statement of identity whose predicate is wholly contained in its subject, like "2 + 3 = 5."
