Eonon 9" TFT LCD COLOR MONITOR Instruction Manual

On the basis of image-quality alone, in my opinion LCD is the monitor of choice for "office" and technical/CAD applications (largely text-based, or detailed but colour-non-critical graphics), while CRT still has the upper hand for high-end photographic/art work and for television displays.

LCD monitor technology and tests - techmind.org

LAPIS Semiconductor excels in a number of technologies, including low power consumption, digital-analog mixed signals, high-frequency circuits and memory design, and provides logic LSIs, memory LSIs, display driver LSIs, and foundry services.

Introduction. Calibration is a subject which comes up frequently wherever there is discussion of monitors. As you will hopefully realise from our reviews, there are two important things to consider when purchasing a new screen, and when you might be concerned about it's ability to render colours accurately: 1) How does the screen perform at ...
